SUMMARY

Senior Frontend Engineer with 8+ years of React expertise and a developer who never stops exploring. I care deeply about code quality and building fast, accessible, production grade UIs that hold up at scale. Naturally curious, I'm always exploring what's next: from performance patterns to LLM-powered interfaces. I bring that same energy to every team I join and shipping clean work, raising the bar, and never stopping learning. Experienced in async, distributed team workflows across time zones. Currently exploring LLM-powered UI development with OpenAI and Anthropic APIs.

TECHNICAL SKILLS

Core	React.js, TypeScript, JavaScript (ES6+), Redux, Zustand, HTML5
Styling	CSS3, LESS, SASS, Tailwind CSS
Testing	Jest, React Testing Library, Cypress, Playwright
Backend & API	Node.js, RESTful APIs, GraphQL(basic), PostgreSQL, Contentful (CMS), Oracle, Scala.
Devops & Cloud	Jenkins, AWS (S3, Lambda - basic), Bitbucket, TeamCity, CI/CD.
Tools	Git, Webpack, ESLint, Figma, Vite, Storybook, Jira, Confluence, Trello, Slack.
AI / Prompt Eng	Agentic AI concepts, Prompt Engineering basics, LLM API usage (OpenAI / Anthropic)

EXPERIENCE

Specialist- Software Engineering

Feb 2022 - Present

LTM Limited (A Larsen & Toubro Group Company) – Noida, India (Remote- Hybrid)

Stack: *React, Typescript, Redux, Node js, Jest, Cypress, Playwright, Jenkins, Scala*

- Led a remote cross-functional team of 5 engineers delivering a B2B SaaS web platform 20% ahead of schedule, coordinating async across multiple time zones via Jira and Confluence.
- Architected 30+ reusable, WCAG 2.1-compliant React components, reducing new feature development time by 25% and establishing a shared component library adopted across the team
- Refactored legacy frontend codebase, boosting overall performance by 30% and increasing automated test coverage from 45% to 95% with Jest and Cypress.
- Reduced First Contentful Paint (FCP) by 40% through bundle optimization, lazy loading, and tree-shaking and directly improving core web vitals and Lighthouse scores.
- Mentored 4 junior developers, cutting onboarding time by 50% through structured code review standards, Git workflow training, and internal documentation.
- Migrated static pages to a modular, hook-based React architecture, improving maintainability by 35% and enabling independent feature deployments.
- Integrated AI tools (GitHub Copilot, Cursor) into daily development workflow — accelerating code writing and review cycles, using LLMs for debugging, generating documentation, and prototyping LLM-powered UI features.

System Engineer

Mar 2019 - Feb 2022

Tata Consultancy Services (A Tata Group Company) – Noida, India (Remote - On-site)

Stack: *React, Redux, Node js, Oracle DB, Contentful CMS, Figma, AWS S3, CI/CD*

- Delivered 10+ interactive data dashboards using React, Redux, and Node.js with Oracle DB, improving stakeholder decision-making speed by 30%.
- Integrated Contentful CMS enabling non-technical editors to publish updates independently, eliminating dev bottlenecks and reducing editorial cycles by 70%.
- Converted Figma designs into pixel-perfect, mobile-first UIs, increasing Lighthouse UX scores by 40% across multiple client-facing applications.
- Improved application performance by 35% using React memoization, code splitting, and targeted render optimization.

- Collaborated with QA, DevOps, and Design teams in weekly Agile sprints, maintaining zero-downtime release cadence throughout the engagement.

Software Developer

Jun 2018 - Feb 2019

Skill Lotto Solutions Private Limited (A Sugal & Damani Group Company) – Gurugram, India (On-site)

Stack: *React, Node.js, Rest API's, PostgreSQL*

- Built a customer-facing lottery web app and admin dashboard using React + Node.js, serving high-concurrency user traffic across multiple Indian states with a focus on security, compliance, and mobile-responsive performance.
- Engineered secure transaction and session flows meeting compliance requirements for real-money gaming — handling sensitive user data with strict input validation and role-based access controls.
- Delivered features and production hotfixes under tight deadlines, maintaining high availability during peak traffic periods with rapid turnaround on critical issues.

EDUCATION

Bachelor of Technology, Computer Sciences

Aug 2014 - May 2018

Kurukshetra University, Geeta Engineering College – Haryana, India

- Graduated with Honors.
